SUBJECT PREPARATION NOTED BY TI	YES(1)	NO (2)	RF (77)	
BIA010. Confirm perceived height and weight obtained earlier or height and weight measurement done or will be done. <i>FMT_YES_NO.</i>				
BIA020. Confirm Urine Sample done and/or Subject urinated before BIA <i>FMT_YES_NO.</i>

BIA050. Confirm Subject has removed metal jewelry, eyeglasses, hair ornaments and other metal objects from the hair or body—refusal to remove small objects does not exclude. <i>FMT_YES_NO.</i>				

This next exam will only take a few minutes and you will not feel anything during the measurement. I am going to wipe off your right hand and foot with an alcohol swab and attach these four electrodes (or patches). I will connect the electrodes to this machine and start the measurement. The machine will send a very small current through the electrodes but it is at such a low level that you will not be able to feel it. The measurement will take only a minute. The machine measures the amount of water in your body (the amount of water inside and outside of your cells). This helps scientists determine the amount of body fat. Before we begin, I'm going to ask a few questions to be sure doing this test will give us valid results and also will not interfere with devices you may have in your body
