NOTE: Income ranges will be preprogrammed so that if a family income falls in a range that may be close to the poverty level for that size family, the computer will generate an extra question to try to determine if household income is above or below the poverty line for that size family. The computer will insert the dollar amount \* in the following question.

This question is not asked when done on paper.

INQ.205. Is your income below or above \$(variable\*) per {year/month}?
