WHY SHOULD I TEST MY WELL?

Private well owners are responsible for regularly testing and maintaining their well. Unwanted substances known as contaminants can get into private well water.

Contaminants in your drinking water may lead to health problems. This makes private well testing important for better health.

Testing is often not required but is encouraged because many contaminants may not cause any change in your water’s taste, color, or smell.

WHAT SHOULD I TEST FOR?

The Wisconsin Department of Natural Resources (DNR) recommends these tests for common contaminants that can be harmful to human health:

1. **Bacteria**
   - Test once a year
   - Test any time the well is modified
   - Test any time there is a change in smell, taste, or color

2. **Nitrate**
   - Test once a year
   - Test before a pregnant person or infant drinks the water

3. **Arsenic**
   - Test when a new well is installed
   - Test yearly if arsenic was previously detected
   - Test at least once every 5 years

Additional Tests

Additional tests may be recommended for your situation. Please see go.wisc.edu/water-testing for more information.
WHERE CAN I GET A TEST?
Inquire about well testing here:

Dunn County Land and Water Conservation
3001 US Hwy 12 East, Suite 240A
Menomonie, WI 54751
(715) 232-1496
https://dunncountywi.gov/conservation

Commercial Testing Lab - Colfax, WI
Contact the lab for more information about testing:
514 Main Street, Colfax, WI 54730
(715) 962-3121
http://colfaxtestinglabs.com/labs-inquiry-form/

Additional certified labs at:
https://go.wisc.edu/private-wells

Test kits are available:
Monday – Friday 8:00 a.m. - 4:30 p.m.

How much does it cost?
Test kits and kit packages range in price starting around $30. Call your local health department or testing lab for more information.
Free test kits may be available for residents who qualify.

WHAT SHOULD I DO IF I HAVE HIGH LEVELS OF CONTAMINANTS?

1 General Questions?
Contact your local health department, or the testing agency you used.

3 Learn About Mitigation Strategies
Find more information on filtration and other household water treatment systems at:
https://go.wisc.edu/mitigation-strategies

Find a water treatment device for your needs on the National Science Foundation’s Website:
https://info.nsf.org/Certified/DWTU/

2 Learn About Health Concerns
Contact: Wisconsin Dept of Health Services
