WHY SHOULD I TEST MY WELL?

Private well owners are responsible for regularly testing and maintaining their well. Unwanted substances known as contaminants can get into private well water.

Contaminants in your drinking water may lead to health problems. This makes private well testing important for better health.

Testing is often not required but is encouraged because many contaminants may not cause any change in your water’s taste, color, or smell.

WHAT SHOULD I TEST FOR?

The Wisconsin Department of Natural Resources (DNR) recommends these tests for common contaminants that can be harmful to human health:

1. **Bacteria**
   - Test once a year
   - Test any time the well is modified
   - Test any time there is a change in smell, taste, or color

2. **Nitrate**
   - Test once a year
   - Test before a pregnant person or infant drinks the water

3. **Arsenic**
   - Test when a new well is installed
   - Test yearly if arsenic was previously detected
   - Test at least once every 5 years

Additional Tests

Additional tests may be recommended for your situation. Please see go.wisc.edu/water-testing for more information.
WHERE CAN I REQUEST A TESTING KIT?

UW-Oshkosh Environmental Research and Innovation Center (ERIC)
Test kits are available in the ERIC lobby Mon-Fri 8:00 a.m. – 4:00 p.m.
783 Pearl Avenue, Oshkosh, WI 54901-8640
(920) 424-3148
e-mail: eric@uwosh.edu
website: https://uwosh.edu/eric/environmental-health-testing/water-testing/

Contact the Winnebago County Health Dept. with any questions.
(920) 232-3000 or health@winnebagocountywi.gov
You may also visit the Winnebago County Health Dept. website:
https://www.winnebagocountywi.gov/health/contact-us

Additional certified labs at:
https://go.wisc.edu/private-wells

What does testing cost?*
Homeowner’s $60
Includes total coliform bacteria/e. coli
bacteria, nitrate, arsenic, pH, hardness,
alkalinity, and iron
*Other tests are available, call for pricing.

WHAT SHOULD I DO IF I HAVE HIGH LEVELS OF CONTAMINANTS?

1 General Questions?
Contact your local health department with
questions about well water quality.

2 Learn About Health Concerns
Contact: Wisconsin Dept of Health Services
(608) 266-1120
dhsEnvHealth@wi.gov
https://go.wisc.edu/dhs-private-wells

3 Learn About Mitigation Strategies
Find more information on filtration and other
household water treatment systems at:
https://go.wisc.edu/mitigation-strategies

Find a water treatment device for your needs on the
National Science Foundation’s Website:
https://info.nsf.org/Certified/DWTU/

4 Schedule Well Repairs
If your tests indicated a problem, you may need to
contact a well driller or pump installer.
